

Part Name: PVM-14N6U_Faceplate_Decal_OEM_Style

Material Specification:

Adhesive backed vinyl or similar. Printed and diecut with added film laminate to protect from scratching. 0.6 mm overall material thickness (substrate + film laminate +adhesive). Decals may be thinner than 0.6mm, however, due to irregularities in the molded plastic case, the decal may not sit totally smooth when applied. Clean surface well before application to remove dirt and adhesive residue from old decal.

Designer’s Notes:

Button hole spacing is annotated in drawing. Button holes are 10mm x 10mm with 1mm radius corners. Labels are created using **Helvetica Neue LT Com Extended 53** typeface. Print artwork and dieline (toolpath cutline) are separated into individual layers in this PDF. Verify reference dimensions before cutting.
